

### DOI Work Activity 2D: Evaluate State Regulatory Programs - Coal

<b>Program Area:</b>	Resource Use - Energy
<b>End Outcome Goal:</b>	UEO 1 - ENERGY - Manage or Influence Resource Use to Enhance Public Benefit, Responsible Development, and Economic Value
<b>Intermediate Outcome:</b>	This activity does not align to an intermediate outcome
<b>DOI Sub process:</b>	4b - Conduct inspections

**Examples/Notes:** This activity applies only to OSM

**Work Activity Description:** Includes all activities related to the process of evaluating and assisting States in the administration, implementation, and maintenance of approved programs under the Surface Mining Control and Reclamation Act (SMCRA) of 1977 to regulate coal exploration and surface coal mining and reclamation operations on non-Federal and non-Indian lands. This component involves the development of oversight policy, preparation of performance agreements between OSM and State agencies, conducting evaluation and site visits to coal mining operations for the purpose of data collection and preparation of reports to document the results of the studies and assistance activities. Federal enforcement of coal mining regulations in primacy States may also occur. Activities associated with developing nationwide rulemaking to modify the existing Federal requirements governing the regulation of coal mining operations, providing assistance to States in modifying approved programs, and the review and approval of changes to approved State programs are included in this component.
